

Sirs,

I would like to add my support to the proposal to add the 2.5 Ghz MMDS/ITFS band to the list of unlicensed frequencies.

We are currently using 5800, 2400 and 900 MHZ to distribute high speed internet access to the rural community that we are located in. The addition of the 2.5 Ghz band, or a portion of it, would greatly help us provide reliable access, as well as let us expand existing tower sites to a larger customer base.
